Smart weighing for smart business!

Data security

All information is stored
in an online server so the data
will not be lost in case of
a technical failure, fire emergency
or hardware theft.

Convenience

All weighing data and reports
are available 24/7 and can be
accessed from any device
with internet connection.

Centralized management of weighing spots

Scale Expert Cloud enables easy
management of different
weighing spots in distant locations.

Effortless integration of additional weighing spots

Regardless of the quantity
of weighing spots, additional
spots can be simply added
to the system.

Direct link with other systems

Scale Expert Cloud can be linked
with other company's programs
(e.g. accounting, stock management, etc.)
or various institutional systems.

Adjustable user rights and interface

The program allows to create different
levels of user accessibility to make sure
that important amendments in the
system are made only by qualified
personnel or executives.

Automatic updates

All system updates and upgrades are
made online via internet connection.

User-friendly data management

Weighing data including customers,
vehicles, drivers and other information
can be simply filtered and exported
in MS Excel format.
